and a kitchen. Also on the ground floor there is a toilet, a laundry room, a study and a wellness area with a sauna. The living room has direct access to a covered terrace of 29.25 m², a swimming pool with a sunbathing area and a fenced plot.

On the first floor there are 4 bedrooms, each with its own bathroom. Three bedrooms have access to a large terrace with a panoramic view of the sea and nature.

On the roof terrace, which is reached by internal stairs, there is a summer kitchen and a jacuzzi.

Heating is provided by an electrically powered heat pump through underfloor heating. A fireplace in the living room can serve as an additional source of heating living room, while cooling is provided by air conditioners (all rooms). The carpentry is aluminum with three-layer glass, while the facade is energy-efficient, which ensures low heating and cooling costs. The villa is built with top-quality materials - 25 cm porotherm bricks, ceramics and first-class parquet floors, as well as sanitary facilities.

The villa has a swimming pool of 32 m² and has two parking spaces. The first phase of video surveillance and alarm system was implemented in the villa.

The planned completion of construction is the summer of 2023.
