room, a study and a wellness area with a sauna. The living room has direct access to a large covered terrace, swimming pool with sunbathing area and fenced land.

On the first floor there are 4 bedrooms, each with its own bathroom. Three bedrooms have access to a large terrace with a panoramic view of the sea and nature.

On the roof terrace, which is reached by internal stairs, there is a summer kitchen and a jacuzzi.

Heating is provided by an electrically powered heat pump through underfloor heating. A fireplace in the living room can serve as an additional source of heating the living room, while cooling is provided by air conditioners (all rooms). The carpentry is aluminum with three-layer glass, while the facade is energy-efficient, which ensures low heating and cooling costs. The villa is built with top-quality materials - 25 cm porotherm bricks, ceramics and first-class parquet floors, as well as sanitary facilities.

The villa has a swimming pool of 32 m² and has two parking spaces. The first phase of video surveillance and alarm system was implemented in the villa.

The planned completion of construction is the summer of 2024.
